Calvert County Public Schools has requested contract bids from private contractors for the **"Before and After Care Program."** They want to find a cheaper way of providing this care. ***Cheaper means not paying trusted people good wages and benefits!*** This means that the committed CCPS employees will no longer provide this valuable service ***to your children!*** An outside contract will replace the dedicated CCPS employees with contract workers who are usually poorly paid and are not committed to your school district and your community. When school boards turn to contractors they sabotage employees, the school district, and the community. **Clearly, when work in a school district is sold to the lowest bidder everyone loses.** The old adage, "You get what you pay for," is true! Please help persuade the Board of Education to keep the program intact and staffed by trusted CCPS employees.
